Refactoring Model To Common Package

Refactoring Model To Common Package

- **Model** - Objects exposed as JSON
- **Problem**: in Spring, serialization / deserialization expects same package / object name.
  - Could address w/additional Jackson configuration
- **Solution** move model objects to package - 'guru.sfg.brewery.model'
  - All services are related under the 'Brewery' set of services
- **Problem** Lombok Builders with parent classes problematic
  - **Solution:** flatten classes
