

# Spring Boot Microservices

---

Beginner to Guru

Assignment - Create Inventory Failover Service

## Assignment - Create Inventory Failover Service

- Create a new Spring Boot microservice for inventory failover
- For HTTP GET to path 'inventory-failover' return a inventory DTO with 999 for on hand
  - Use all zeros for beer id
  - name service 'inventory-failover'
- Add Eureka client and configure service to register with Eureka
